Living Well with Dystonia:

Dystonia is a movement disorder that impacts the physical body, and it can also affect emotional and psychological health. There is no single strategy for living well with dystonia that works for everyone. The following suggestions have been compiled from individuals with dystonia, support leaders, and healthcare professionals.

Seek Out Expert Healthcare Providers

It often takes a team of experienced professionals to diagnose and treat dystonia. This may include a movement disorder neurologist, physical therapist, psychiatrist, psychotherapist/counselor, and others.

Actively Participate in Your Treatment

Learn about dystonia. Make informed choices about your care with the input of your medical team.

Develop a Multi-Layered Support System

Seek out supportive family and friends, local dystonia support groups, online support groups, community events, and self-help resources. The help of a psychotherapist or counselor to help navigate concerns and vulnerabilities.

Listen to Your Body

Respect and honor your individual need for sleep, rest, nutrition, exercise, relaxation, and time/scheduling.

Exercise

The benefits of exercise can be profound. Consider working with a physical therapist to develop an exercise plan that works for you.

Seek Help When You Need It

If you need assistance, reach out and be specific about what you are having trouble with. Accept help when offered—and without guilt.

Treat Depression & Anxiety

Depression and anxiety can dramatically impact quality of life and the severity of motor symptoms. Consider being evaluated for depression and/or anxiety and, if symptoms are present, seek treatment.

Be Mindful of Stress

Regular stress reduction and relaxation practices can have a positive impact on symptoms and overall well-being.

You are not alone.

DMRF Canada, and our network of volunteers, patients, and professionals are here for you. Visit: www.dystoniacanada.org/dystoniawellness to learn more.
