

Have you been diagnosed with adult-onset dystonia and want to contribute to research?

We invite you to participate in a study investigating how brain circuits are wired and how they function in patients with adult-onset idiopathic dystonia

Who can participate?

- People with adult-onset idiopathic dystonia.
- 18 years of age or older.
- No history of another neurological condition.

What is involved?

- Clinical assessments at the Movement Disorders Clinic (Area 3) involving physical examination and questionnaires.
- 1-hour MRI scan of your brain
- Time commitment is approximately 2 hours.

An MRI scan is a painless test that creates clear images of the structures inside your body using a large magnet, radio waves, and a computer
